

Trials at the Speed of Technology

Data Management

Further increase the value of DSG's award-winning eCaseLink software by including any one or a combination of our data management services:

- Use of DSG Data Management SOPs
- Project Management
- User Acceptance Testing
- Coding of Adverse Events/Concomitant Medications/ Medical History
- Clinical Data Review
- Query Management
- SAE Reconciliation
- External Data Reconciliation (i.e., Lab, Diary, IVRS)

Data Management

DSG's Data Management division provides a range of innovative, customer-focused services traditionally outsourced to full-service CROs.

Our Data Management services encompass everything from eCRF design and database set-up through database lock, providing clean, timely, and cost-effective deliverables to sponsors every time.

Years of experience help us anticipate your challenges and needs so that, instead of reacting to data issues, we design and deliver strategic and proactive data management services and support. We do not wait for problems to occur: we prevent them from happening in the first place. By planning strategically up front, we can minimize problems and challenges further down the line.

Our experienced team of clinical trial professionals provide strategies to maximize eCaseLink functionality for your study. This might include recommendations regarding best practices for data management and process re-engineering, or protocol review and input from a data management perspective. We also provide guidance for sponsor EDC teams that are less experienced with EDC.

You can count on DSG to become an integral part of your data management team. DSG's products and services are governed by our own set of rigorous corporate SOPs, which have been audited by our top pharmaceutical customers. Our systems and processes comply with ICH, GCP, and FDA 21 CFR Part 11 regulations.

About DSG

DSG Inc. supports clinical trial data collection and management with innovative technology solutions including Electronic Data Capture with specialized Clinical Data Management services, Electronic Patient Diaries, Clinical Trial Management Systems and digital on-demand Case Report Form publishing management software.
