

Safety System

Genuinely Innovative. Truly Integrated.

eCaseLink8.0™ Safety System

Streamline Safety

DSG's eCaseLink Safety System streamlines the safety recording, reporting process, data entry on SAEs, and can store documents associated with the safety event that facilitate the generation and tracking of queries.

The eCaseLink Safety System enables Medical Monitors to electronically record the Serious Adverse Event form information received from a site. The online form can be prefilled with fields read from DSG's eCaseLink EDC system, such as demographic information. Key events, dates and status are easily tracked. The system alerts the medical monitor to differences between the safety data entry form and data on eCRFs in the eCaseLink EDC system.

Data Capture of a Safety Event

An online data entry form facilitates the capture of extensive information about the safety event. An FDA 3500A MedWatch form can be generated from the data entered.

Extensive Tracking

In addition, the eCaseLink Safety System can record extensive tracking information about the safety event, including the date and status of submissions to regulatory agencies.

The eCaseLink Safety System makes it easy to upload documents associated to the adverse event, making it convenient to access critical documentation at any time.

The system can also facilitate the generation and tracking of queries associated with the safety event.

- Streamlines the safety event recording and tracking process
- Generates SAE submission forms
- Stores documents associated within the safety event
- Facilitates the generation and tracking of queries associated with the safety event

About DSG

DSG Inc. supports clinical trial data collection and management with innovative technology solutions including Electronic Data Capture with specialized Clinical Data Management services, Electronic Patient Diaries, Clinical Trial Management Systems and digital on-demand Case Report Form publishing management software. DSG has successfully supported over 1,000 clinical trials for more than 325 companies, at over 18,000 sites in over 68 countries. Founded in 1992, DSG is a global company headquartered in Malvern, Pa., with additional offices in the U.S., Japan and India.
