

Trials at the Speed of Technology

Discover the benefits of DSG's award-winning eCaseLink™ software

DSG's award-winning eCaseLink software meets the real-world needs of clinical trial professionals and consistently delivers high site acceptance and user satisfaction. eCaseLink delivers clean data, rapid database lock, and more rapid FDA submission and acceptance, resulting in high ROI.

Instant Validation

In eCaseLink, all edits, including cross-panel logic checks, fire immediate warnings as soon as data is entered into fields, without submitting to the server. Instant edits eliminate multiple saves/submits for site users and result in cleaner data, keeping clinical trials running on time.

Rapid EDC Study Start-Ups

eCaseLink's flexible and scalable architecture allows DSG to create fully functional eCRFs, with built-in edit checks and cross-panel validation in a point-and-click environment. Library eCRFs are saved and re-used, affording faster trial set-up for future studies.

High Site Acceptance

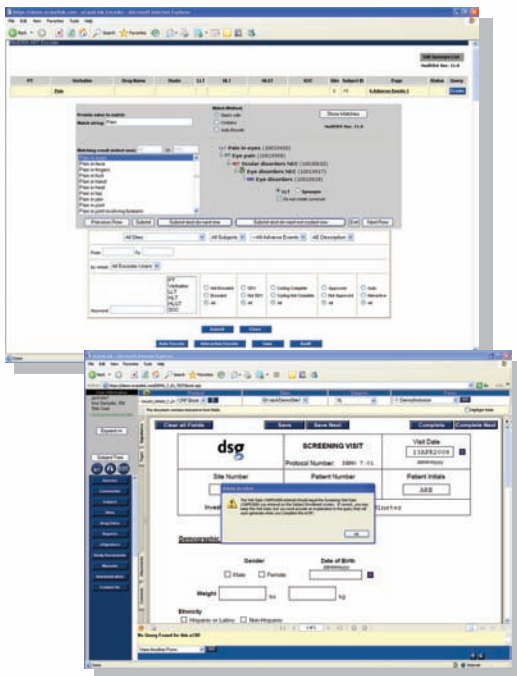

By leveraging Adobe's PDF technology, eCaseLink is an intuitive EDC solution that presents eCRFs so easy to use that training is accomplished in two hours and help desk support needs are minimal.

Multi-language

eCaseLink multi-language capabilities include Japanese, Chinese and Western European languages to support trials worldwide. This allows sponsors to run their clinical trial operations on a single, global platform without needing to install different versions of the software for different languages. Additionally, data managers and clinicians can work together collaboratively using a single, centrally-managed global database regardless of geographic location or language.

Mid-Study Changes

eCaseLink allows you to manage protocol amendments and any mid-study changes quickly and seamlessly without any system downtime.

Local Lab Management System

eCaseLink enables data managers to effectively manage local labs and normal lab ranges, and also provides interactive review of laboratory data.

Comprehensive eSourcing and Integration

Data integration functionality allows users to integrate and manage data from a wide variety of industry sources in a single database with convenient dashboards for viewing and accessing data including:

- Core, central, specialty laboratory data
- IVRS
- CTMS
- eDiaries/ePRO
- ECG
- CT Scans & MRIs
- Topographies & Radiographics
- EMR
- Medical Device Output
- Safety Data

Robust Reporting

More than 30 standard reports are available as well as a library of configurable standard reports, custom and ad-hoc reports. SAS On-Demand Exports and full Ad-Hoc Reporting enable real-time data access and management.

Global Support

DSG provides 24/7 global support for all client deployments.

Clear Cost Advantage

DSG offers clients reasonable, straight-forward, cost effective pricing.

DSG's eCaseLink™ provides:

- Application development
- A single build for multi-language global studies
- Rapid, flexible implementation
- Comprehensive eSourcing capabilities
- Data integration functionality
- Technology Transfer
- Standard, custom and ad-hoc reports
- Real-time access to trial data and reports
- Immediate edits upon data entry – including cross-panel validation – for exceptionally clean data
- Web authoring tool for building eCRFs with point-and-click ease
- SAS On-Demand Exports
- Auto-encoder for dictionaries, including MedDRA and WHO drug and sponsor synonym lists
- Integrated query management
- CDISC Standards
- Customized reporting

Results Driven Support

DSG's highly experienced professionals have both clinical and data expertise to support clients through every step. We believe it is integral to know our clients' business and know how our support services can help improve their practices.

Comprehensive support services include:

- Experienced clinical Data Management
- Online support
- 24/7 Help Desk support
- Training
- Proactive system monitoring

About DSG

DSG Inc. supports clinical trial data collection and management with innovative technology solutions including Electronic Data Capture with specialized Clinical Data Management services, Electronic Patient Diaries, Clinical Trial Management Systems and digital on-demand Case Report Form publishing management software. DSG has successfully supported over 800 clinical trials for more than 325 companies at over 18,000 sites in over 68 countries. Founded in 1992, DSG is a global company headquartered in Malvern, Pa., with additional offices in the U.S., Japan and India.
