

Press Release*SOURCE: Premier Research, DSG***Premier Research Partners with DSG for Electronic Data Capture Services**

PHILADELPHIA, Oct 14 /PRNewswire/ -- Document Solutions Group, Inc. (DSG), a preferred provider of innovative electronic data capture technologies and services in the healthcare industry, and Premier Research, a Division of CRC Development Ltd., a leading contract research and development organization have signed a non-exclusive partnership agreement. This Agreement represents a working relationship that will involve joint marketing efforts and a mutual contracting of complementary products and services from both companies to biotechnology, pharmaceutical and medical device companies. Both companies will also seek opportunities to serve government-sponsored clinical research.

This reciprocal marketing arrangement identifies DSG as the EDC vendor of choice for Premier Research and establishes a referral practice. It will allow both DSG and Premier Research to serve their customers better by offering capabilities outside the scope of their respective organizations.

"This partnership with DSG builds on Premier Research's existing strength and complements current technology offerings for our trial sponsors" stated Dr. Guy Patrick, Chief Commercial Officer at CRC. "We are pleased that DSG has chosen us to advance data collection and management services for our sponsor companies and trial sites internationally."

"Since our first EDC trial in 2000, DSG has built a Sponsor clientele based upon satisfying deliverables and high site acceptance. We are pleased to partner with Premier Research, a global CRO with an excellent reputation," said Tony Varano, President and CEO, DSG.

About DSG

DSG, Inc., employee owned since 1992, delivers innovative clinical data capture software products and related services, including EDC, electronic patient diaries and digital on-demand CRF publishing software, to life sciences clients. eCaseLink™, DSG's proprietary EDC technology, in the display of edit checks differs from all other applications, resulting in high user acceptance; elimination of "page turn rate" issues; a large reduction in the number of submits/saves to the server; and nearly zero system-related support calls. DSG's products allow friendly, accurate and efficient data capture at any investigator site regardless of the site's technological infrastructure.

About Premier Research

Premier Research, headquartered in Philadelphia, is the U.S. division of CRC Development Ltd. CRC is a full-service, International Contract Research Organization (CRO) headquartered just outside of London and with offices and staff across the USA, throughout Europe, and Israel. The company was founded in 1989 and has been successfully delivering comprehensive, integrated, contract research services to the pharmaceutical industry for almost 15 years.
