

FOR IMMEDIATE RELEASE

DSG Closes Fiscal Year with Record Growth

OAKS, PA (February 16, 2005) – DSG, Inc. a leading clinical data trials software provider, closed the 2004 fiscal year with record revenue growth and record profit growth of 112% over 2003. In addition, DSG increased its portfolio by 25 clients and completed over 70 clinical trials. Since its founding in 1992, DSG has achieved thirteen consecutive years of profit and revenue increases with zero-debt.

The 100% client-generated growth, was distributed between DSG's core suite of products, eCaseLink™, eDiaryLink™, as well as DSG's newest product, CaseXport™, DSG's fully integrated study software that allows submission-ready data capture. Later this month, DSG will break ground on a new 68,000 sq ft. facility located in Malvern, PA, to accommodate its expansion.

"DSG has experienced rapid growth at every level of our organization, through diligence, hard work and an unwavering commitment to the success of each trial, garnering us a loyal, repeat client base. For thirteen years, we have invested in leading edge technologies to create innovative products that effectively deliver large volumes of clinical data with high site acceptance and user satisfaction. We are the market leader and provider of the industry's only fully integrated EDC and patient diary software," said Tony Varano, President and CEO of DSG. "We take pride in giving our clients the best clinical data solutions in the industry, and we will continue to provide ground-breaking products as the industry demands. 2005 is going to be a very exciting year at DSG."

About DSG, Inc.

Since 1992, DSG, Inc. has been supporting clinical trial data collection with innovative technology solutions including EDC, electronic patient diaries and digital on-demand CRF publishing management software to over 300 companies in the life science industry. DSG's products allow friendly, accurate and efficient data capture at any investigator site regardless of the site's technological infrastructure. eCaseLink™, DSG's pioneering EDC technology, allows site users immediate server edits, without the traditional need to first save or submit, and offers easier site acceptance, faster submission speed, minimal support calls, and nominal set up time. DSG has successfully supported over 200 clinical trials, at over 14,000 sites, with over 200,000 patients world-wide. For more information, please visit www.dsg-us.com.
