EDC Technology Transfer Made Seamless with ArchiTECH Affiliates Program

OAKS, PA (April 21, 2005) – DSG, Inc. a leading eClinical data management software provider, has recently implemented the ArchiTECH Affiliates Program for technology transfer to several major contract research organizations in the biotechnology industry. ArchiTECH Affiliates is a proprietary program that allows sponsor's to successfully bring electronic data capture and electronic patient reported outcomes in-house for a fraction of the cost of licensing EDC on a per trial basis.

Many pharmaceutical and contract research organizations are now requesting technology transfer programs from their EDC providers as a more cost-effective tool in the clinical data management process. The ArchiTECH Affiliates program's four step process can be used by both existing and new clients desiring EDC technology transfer. The simple process teams experienced DSG project managers and engineers with sponsor's clinical data managers to create a sponsor-specific technology fully integrated and scalable dependent on the sponsor's needs. The technology build tool requires zero programming knowledge and can be used by anyone involved in the clinical data process. Using a team-based, hands-on approach, sponsors and the DSG team work together on two pilot studies; the first lead by DSG, and the second lead by the sponsor. By the third study, DSG works as a consultant, providing service and support when necessary. Sponsors are encouraged to brand the technology related to their services, and a licensing fee is required only on usage.

"Technology transfer is an integral part of the EDC evolution. Over half of our clients have some sort of tech transfer in place, and ArchiTECH Affiliates is the last piece of the puzzle," said Tony Varano, President and CEO of DSG. "We know that many pharmaceutical companies and CRO's are hesitant to use an outsourced vendor for electronic data capture. With ArchiTECH Affiliates, they can be confident that they will maintain managerial control of their studies at a significant cost savings."

About DSG, Inc.

Since 1992, DSG, Inc. has been supporting clinical trial data collection with innovative technology solutions including EDC, ePRO and digital on-demand CRF publishing software to over 300 companies in the life science industry. DSG's products allow friendly, accurate and efficient data capture at any investigator site regardless of the site's technological infrastructure. eCaseLink™, DSG's pioneering EDC technology, allows site users immediate server edits, without the traditional need to first save or submit, is fully integrated with eDiaryLink™ ePRO, and offers the highest site acceptance, fastest submission speed, and nominal set up time. DSG has successfully supported over 200 clinical trials, at over 14,000 sites, with over 200,000 patients world-wide. For more information, please visit www.dsg-us.com.
