

FOR IMMEDIATE RELEASE

DSG, Omnicare Clinical Research Announce Global Partnership Agreement

OAKS, PA (July 26, 2005) – DSG, Inc. the world's largest privately held eClinical data management software provider, and Omnicare Clinical Research, one of the world's leading clinical research organizations, have announced a global partnership agreement, enhancing both companies' abilities to provide clinical data management solutions to the pharmaceutical and life sciences industries.

DSG will provide customized electronic data capture solutions relevant to the needs of Omnicare's growing client base in order to facilitate the fastest collection of accurate data available. With this agreement, Omnicare will be able to provide robust data management capabilities while using DSG's EDC software to decrease setup time, validation and data cleaning. In turn, DSG will benefit from Omnicare's vast amount of clinical resources and therapeutic expertise.

"Omnicare, one of the industry's most successful and experienced CROs, is committed to providing its clients with shortened clinical trials, and with eCaseLink they will receive unparalleled results," said Tony Varano, President and CEO of DSG. "The life sciences industry is changing rapidly, and DSG is focused on adapting with the needs of our clients. CROs like Omnicare will be able to streamline their business using DSG's innovative suite of products, resulting in quicker drug development."

"As our clients' needs grow, we will continue to depend on the CRO infrastructure to leverage our strengths. We are not the type of company to go out and hire 100 new employees for new trials. Developing partnerships with organizations, like Omnicare, strengthen both DSG and our clients. We are very proud to collaborate with such a successful organization and we will continue to provide them with everything DSG has to offer."

About DSG, Inc.

Since 1992, DSG, Inc. has been supporting clinical trial data collection with innovative technology solutions including EDC, ePRO and digital on-demand CRF publishing software to over 300 companies in the life science industry. DSG's products allow friendly, accurate and efficient data capture at any investigator site regardless of the site's technological infrastructure. ECaseLink™, DSG's pioneering EDC technology, allows site users immediate server edits, without the traditional need to first save or submit, is fully integrated with eDiaryLink™ ePRO, and offers the highest site acceptance, fastest submission speed, and nominal set up time. DSG has successfully supported over 250 clinical trials, at over 14,000 sites, with over 200,000 patients worldwide. For more information, please visit www.dsg-us.com.
